

# Navigating Hyflex Instruction

## Course Overview

**\$330**

Hyflex instruction is a teaching model that allows instructors to teach a single course in both face-to-face and online formats at the same time. This gives students the flexibility to choose how they participate in class.

This course is designed to introduce instructors to hyflex teaching and also to help experienced participants extend and grow their knowledge. In this course, you will participate in activities and learn practical techniques that can be immediately applied to your instruction.

Approximately one week before the course starts you will receive a confirmation email that provides additional course details.

Select sections of CEMV 151 course may be eligible for the future skills grant. Learn more about eligibility and how to apply for funding by visiting [cnc.bc.ca/futureskills](https://cnc.bc.ca/futureskills).

**15 hours  
offered hyflex**
